

"Let's Learn About Air Quality!"

A workshop like you've never seen before is coming your way for 6th - 8th grade teachers!

Teachers: Learn how to *plan, introduce, perform, and extend the topic of Air Quality* using the Air & Waste Management Association's *Air Quality Environmental Resource Guide* (ERG), a step-by-step teacher's guide to introducing air quality topics to middle school students. Get your students excited about exploring their environment, culture, and value systems as they relate to one another. The ERG's hands-on activities provide dynamic opportunities for students to learn about air quality topics such as the Earth and Its Atmosphere, Outdoor Air Quality, Sources of Outdoor Air Pollution, and much more.

The ERG's curriculum meets National Educational Standards and has a variety of lessons using history, language arts, science and more!
